

# Netherlands Energy Storage Power Station Planning

## Overview

---

What's happening at RWE's Moerdijk power station?

At RWE's Moerdijk power station, commissioning of its ultra-fast synthetic inertia battery energy storage system is progressing well. With an installed capacity of 7.5 MW and a storage capacity of 11 MWh, this battery is one of the first of its kind on mainland Europe to maintain grid stability, using highly innovative technology.

What is a battery energy storage system (BESS)?

RWE has officially commissioned its first large-scale Battery Energy Storage System (BESS) in the Netherlands at the Eemshaven power station. With a total capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt hours (MWh), the system will be crucial in balancing the power supply and demand within the Dutch electricity grid.

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

What is the capacity of RWE's ultra-fast battery energy storage system?

The system will have an installed capacity of 7.5MW and a storage capacity of 11MWh. After commissioning, the plant will enter a two-year pilot phase. Credit: RWE. RWE has commenced construction of an ultra-fast battery energy storage system (BESS) at its Moerdijk power plant in the Netherlands.
