

New Energy and Energy Storage Operators

Overview

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

Why is China moving to a new type of energy storage?

The move is part of China's broader push toward a green, low-carbon energy transition as well as high-quality economic and social development. It builds on significant growth in the sector. As of the end of 2024, the country's installed capacity of new-type energy storage had reached 73.76 million kilowatts, according to official data.

New Energy and Energy Storage Operators

Global news, analysis and opinion on energy storage ...

Nov 20, 2025 · Germany firmly enters large-scale BESS era with EnBW, Vattenfall and Enertrag project news A trio of large-scale BESS announcements by major power firms of 700-800MWh ...

New-type energy storage poised to fuel China's growth

4 days ago · Megapack is an electrochemical energy storage device that uses lithium batteries, a dominant technical route in the new-type energy storage industry. Tesla's vice-president Tao ...

10 New Energy Storage Companies , StartUs Insights

Dec 2, 2025 · Explore 10 new energy storage companies from 2.8K+ entrants, advancing the industry with flywheel energy storage, underground batteries, micro-channel-based hydrogen ...

China's largest standalone battery storage project powers up

Dec 8, 2025 · A 500 MW / 2,000 MWh standalone BESS in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction period, reflecting China's ...

China leads the world in new-type energy storage capacity

Sep 11, 2025 · "China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China ...

Investment in China's Independent Energy Storage Sector ...

2 days ago · The new policy has fully unlocked the value of independent energy storage as a power system regulator, an executive from a major energy storage equipment manufacturer in ...

Future energy

Dec 26, 2023 · The flywheel energy storage, sodium ion batteries and other technology tests will be carried out at a faster pace, and the solid-state battery electrolyte technology will witness ...

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

New Energy Storage Technologies Empower Energy ...

Nov 15, 2025 · KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower ...

Global Energy Storage Growth Upheld by New Markets

Jun 18, 2025 · The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...
