

New Generation Microinverter Company

Overview

Who are the leading micro inverter manufacturers?

The leading micro inverter market manufacturers such as Delta Energy Systems GmbH, Enphase Energy Inc., SolarEdge Technologies Inc., and SMA Solar Technology AG focus on their investments on technologically advanced, cost-effective, and more secure products and solutions for various applications.

Will Enphase's new microinverters be the future of solar PV?

Solar PV alone is forecast to account for 80% of the growth in global renewable capacity by 2030, according to the International Energy Agency (IEA). By achieving higher power output and efficiency, Enphase's new microinverters can now service not only the residential solar market but also a much larger portion of the commercial market.

What is the global solar microinverter market value?

The global solar microinverter market reached a value of US\$ 231 Million in 2021. Solar microinverters refer to electronic devices used in photovoltaics to convert the direct current (DC) generated by solar panels into alternating current (AC).

Is Infineon supplying gallium nitride technology for solar microinverters?

12 November 2025 Infineon Technologies AG of Munich, Germany says that it is providing its gallium nitride (GaN) technology for the next generation of solar microinverters from global energy technology company Enphase Energy Inc, which is said to be the world's leading supplier of microinverter-based solar and battery systems.
