

# **New Zealand BESS solar container outdoor power**

## Overview

---

The integrated container energy storage system consists of battery cluster, bidirectional power conversion system (PCS), battery management system (BMS), energy management system (EMS), fire control system, lighting system, dynamic ring control system, access control system, isolation transformer (optional), etc. System status multiple monitoring and hierarchical linkage constitute a comprehensive protection system integrating electrical safety and functional safety. 1.2MW-2.58MWh Container system can be configured, standardized and prefabricated design, reduce the user's customization time and construction costs, and reduce safety risks caused by local installation differences and management risks. Is New Zealand's first large-scale grid battery storage system complete?

Construction of New Zealand's first large-scale grid battery storage system is now complete, with Meridian Energy's Ruakākā Battery Energy Storage System (BESS) being officially opened in a ceremony later today.

Will New Zealand invest in battery energy storage systems?

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS). BESS will become increasingly important in the future as New Zealand's power system relies on more intermittent and variable generation. Work set out in the roadmap includes:

Why does New Zealand need a Bess system?

Delaney noted that the BESS system not only benefits the port and its customers but also supports New Zealand's broader supply chain, particularly in managing local energy constraints. The BESS initiative is backed by a US\$500,000 loan from Ara Ake, an organization dedicated to advancing energy innovation in New Zealand.

What is a battery energy storage system (BESS)?

Over recent years, it has become common for utility-scale solar projects in

Australia to include a grid-scale battery energy storage system (BESS) to provide energy generated by the solar farm to the grid outside of the times when the sun is shining.

## New Zealand BESS solar container outdoor power
