

New energy storage units in the Middle East

Overview

Is large-scale energy storage a viable option in the Middle East?

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy projects expanding across the region, energy storage has started gaining traction.

Is energy storage gaining traction in the Middle East?

With renewable energy projects expanding across the region, energy storage has started gaining traction. Unlike Europe, North America, and Asia, where renewable energy and storage technologies are well-established, the Middle East remains in the early stages of development.

Should a MENA energy storage alliance be established?

A report by Arab Petroleum Investments Corporation recommends establishing a MENA Energy Storage Alliance, supported by public-private partnerships, and offering financial incentives like tax benefits and green financing to attract private sector investments.

Is Dewa building a pumped hydro storage facility in the UAE?

In the UAE, DEWA is building a 250 MW pumped hydro storage project in Hatta, set to be the first in the GCC by 2024. France-based energy company EDF has announced plans to explore the development of a 5 GW pumped hydro storage facility in Ras Al Khaimah, UAE. The proposed facility is designed to store energy for up to 12 hours.
