

New solar container outdoor power field in Hamburg Germany

Overview

Why is the port of Hamburg a major economic opportunity?

Handling, production, distributing and using sustainable fuels and energy sources in the port represents a major economic opportunity, HPA said. The Port of Hamburg produces energy to supply more and more ships with onshore electricity from renewable sources.

How does hPa support alternative fuel infrastructure in Hamburg?

Together with private stakeholders, HPA takes pro-actively responsibility and supports the establishment of alternative fuel infrastructure in the port of Hamburg. Tanker Port areas are already bunker-ready in the port of Hamburg for any alternative fuel. Biofuels are locally available and being bunkered regularly.

Why is the port of Hamburg a leader in onshore power supply?

The Port of Hamburg is a European leader in the implementation of Onshore power supply. Following the lead of cruise ships, the focus is now on large container ships. No more smoke billowing into the sky, no more ship engines humming at the berths. Hamburg's quays are becoming cleaner and quieter.

When will Hamburg be able to supply larger container ships?

Hamburg will be able to supply larger container ships as early as 2025. Following CTH (Eurogate), the facilities at HHLA's CTT and CTB terminals will commence operations by the end of this year, while construction work is currently underway at CTA for a planned start of operations in 2025.
