Overview

What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.

How big is a 20 foot shipping container?

Background Note: Standard shipping containers for 20-foot shipping size are approximately 6.06 m in length and 2.59 m in width, offering a standard form for retrofitting photovoltaic systems. [Why Folding Photovoltaic Containers?](#)
