Overview

How much will a solar module cost in 2025?

Some global forecasts even suggested wholesale module prices could stay around that \$0.10/W mark into 2025, though retail prices for homeowners will always be higher due to markups and other costs. Demand is also growing fast, both globally and here in Canada.

Are solar PV installation costs rising?

Here's a simplified table showing that upward trend in installation costs, even while module prices were globally low for part of this time: Average cost per watt (National) reflects the current market trends in solar pv technology. It's also worth remembering that costs aren't uniform across the country.

Why are solar modules so expensive in Canada?

Demand is also growing fast, both globally and here in Canada. The Canadian solar market is expected to grow significantly, around 9% compound annual growth rate (CAGR) from 2024 to 2030. While strong demand can eventually push prices up, the current oversupply situation seems to be the bigger factor keeping module prices low for the moment.
