Overview

What is eticaag energy storage?

EticaAG is the original equipment manufacturer (OEM) of a patented immersion cooling battery energy storage system (BESS) technology, a breakthrough solution that prevents fire propagation from thermal runaway. It sets a new standard in safety for energy storage.

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

Is liquid cooling a good thermal management technology?

The industry has widely adopted liquid cooling as the primary BESS thermal management technology. While this is a step up from traditional air cooling, when it comes to fully mitigating fire risks and effectively managing thermal events in high-density BESS setups, liquid cooling has its limitations, according to Jack Wu.
