Overview

How much does a battery management system cost?

Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets: Ewert Energy Systems - One of the earliest BMS providers (since 2008), Ewert focuses exclusively on high-end custom BMS design, especially for large-scale battery storage systems. Typical price range: \$3,000-\$10,000.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be $\$800,000 * 0.08 = \$64,000$.

How much does a BMS cost?

Prices increase with higher voltage, amp capacities, and parallel/series configurations. Battery Voltage - BMS pricing often correlates to common battery voltages used. For example, basic 12V BMS price for small power banks average \$30-\$200, while 24V BMS price for golf carts or marine run \$100-\$500. High voltage BMS for EVs starts around \$1000.

How much does a hybrid battery management system cost?

With almost full capabilities at partial costs, hybrid BMS presents excellent middle-ground options for many lithium battery applications. Average hybrid BMS price range: \$800-\$1,500. Capabilities and pricing can vary widely for BMS. Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets:
