

# **Outdoor power station factory in Poland**

## Overview

---

Are power plants a foundation of the Polish energy sector?

Power plants and combined heat and power plants burning fossil fuels are a foundation of the Polish energy sector. A new version of our open database on these facilities, the starting point of all energy transition analyses, is now available at [energy.instrat.pl](http://energy.instrat.pl).

Are there power plants in Poland?

The database of power plants in Poland is open access – we encourage you to explore and draw your conclusions. Below are visualisations of selected information from the database. Plenty of aged coal capacity in the south, increasingly many gas CHPs in the rest of the country.

How does a power plant work in Poland?

These thermal units produce electricity (and usually heat) by burning fuels. Approximately 90% of the power units are suitable for cogeneration, i.e., they can generate electricity and heat. The average age of active power plant units in Poland is 35 years, with hard coal units being the oldest, averaging 42 years.

Is there a coal power plant in Poland?

Plenty of aged coal capacity in the south, increasingly many gas CHPs in the rest of the country. Map of thermal power in Poland Map of power plants and combined-heat-and-power plants containing generation units of at least 20 MW in Poland.
