

# **Payment for 100-foot energy storage container for airport use**

## Overview

---

How much does energy storage cost?

Let's explore the costs of energy storage in more detail. Although energy storage systems seem attractive, their high costs prevent many businesses from purchasing and installing them. On average, a lithium ion battery system will cost approximately \$130/kWh.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is the best way to store large amounts of electricity?

Schedule a time to speak with one of our energy experts. The best way to store large amounts of electricity depends on various factors including the specific application, cost, and efficiency goals. Popular methods include pumped hydro storage, battery storage, and thermal energy storage.

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.
