

# **Peru invests in solar energy storage**

## Overview

---

This Andean nation is quietly becoming a heavyweight in energy storage investments, with solar farms popping up faster than you can say "¡Qué calor!" in its sun-baked southern deserts. What is the solar energy industry doing in Peru?

The solar energy industry is following the advances of the wind energy industry in Peru, where all stakeholders (communities, authorities, investors, and NGOs, among others) of the territory are accepting this clean energy as a road to reach sustainable development .

Is Peru a good country to invest in solar energy?

It is recommended that Peru considers as a guide the successful experience of solar energy advances in neighboring South American countries, such as Chile and Brazil, where there is an important number of solar photovoltaic (PV) facilities in operation.

What is the development of solar PV energy in Peru?

Finally, Figure 21 shows the development over time of the installed capacity in MW of solar PV energy in Peru. Figure 21. Evolution (years) of the solar photovoltaic installed capacity (MW) in Peru. Figure 21 shows that the first stage of solar PV energy in the country began in 2012, with strong growth from 2012 to 2023.

Can Peru generate electricity from a solar energy source?

This article presents the enormous potential of Peru for the generation of electrical energy from a solar source equivalent to 25 GW, as it has in one of the areas of the world with the highest solar radiation throughout the year.

## Peru invests in solar energy storage
