

# Philippines Power Storage System

## Overview

---

Can battery energy storage systems be deployed in the Philippines?

In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems (IRESS) in national auction programs have been put in place, actual deployment faces significant hurdles.

Is the Philippines integrating energy storage into its energy mix?

She highlighted the country's existing large-scale pumped hydro facility and a target of 1.1 GW for IRESS deployment through the Green Energy Auction Program, showcasing the Philippines' dedication to integrating energy storage into its energy mix.

What is the future of energy storage in the Philippines?

Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028. Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential.

How many MW of new storage capacity will be built in Philippines?

Around 1,340 MW of new storage capacity, meanwhile, still does not have a definite commercial operations date. The construction of these facilities is expected to augment the country's power supply amid growing energy demand. Under the Philippine energy scenario, peak demand is seen growing by 5.3 percent annually until 2028.
