

Philippines outdoor wind power base station price inquiry

Overview

Where is wind energy available in the Philippines?

The greatest wind resources of the Philippines are in northern and central areas, such as Batanes and Babuyan, and the north and central Luzon areas. Because of the high potential of wind energy in the country, wind energy developers are interested in commercializing wind energy in the Philippines.

How much wind energy does the Philippines have?

According to International Renewable Energy Agency, as of 2022, the Philippines' total wind energy capacity accounted for 443 MW. Additionally, the government aims to expand significantly the country's wind capacity in the coming years and targets 35% of energy generation from renewables by 2035 and 40% by 2040.

Are wind turbines the future of energy in the Philippines?

As energy demand rises, wind turbines are helping the Philippines diversify its energy sources beyond fossil fuels and generating power. According to the National Renewable Energy Plan, the Philippines has set the goal of adopting an additional 1,548MW of renewable energy by 2030.

How much wind energy does the Philippines have in 2022?

Additionally, according to International Renewable Energy Agency, as of 2022, the Philippines' total onshore wind energy capacity accounted for 443 MW. With the country's wind energy potential and companies investing in onshore wind energy, the installed capacity is expected to increase in the forecast period.
