

Podgorica solar Curved Glass

Overview

What is cristacurva curved glass?

Cristacurva offers curved laminated glass made up of tempered, heat strengthened or annealed panes. Curved Insulated Glass Units (IGUs) make life more comfortable by keeping the ambient room temperature pleasant regardless of outside weather conditions.

What is a curved insulated glass unit?

Curved Insulated Glass Units (IGUs) make life more comfortable by keeping the ambient room temperature pleasant regardless of outside weather conditions. They are perfect to complete those rounded corners and other curved architectural elements with the required solar and thermal control.

What are curved glass panels?

The curved glass panels are in some cases carved open to transform a straightforward façade, into an enormous quartz crystal. Benefits of curved glass: The surprising facade changes as it catches the reflections of the sky, the water and the city. Vault-shaped openings offer spectacular, theatrical views of the River Elbe and downtown Hamburg.

What makes cristacurva unique?

At Cristacurva, we seamlessly combine art, engineering and technology to create Curved Laminated Glass with superior visual qualities.

Podgorica solar Curved Glass
