

Polish 5G base station construction bidding

Overview

Should Polish operators deploy mid-band spectrum in a 5G auction?

Late to the game in holding a 5G auction, Polish operators are now racing to deploy mid-band spectrum in a bid to better compete for the growing premium market segment.

What is the first 5G frequency auction in Poland?

In March 2020, the Polish telecom regulator, the Office of Electronic Communications (UKE) opened the first 5G frequency auction, inviting financially sound companies with experience in Poland to participate. The government hopes to raise over \$700 million from the trial auction.

What will Poland's final low-band spectrum auction mean for Europe's 5G rollout?

Poland's final low-band spectrum auction marks a pivotal moment in Europe's 5G rollout, offering key lessons in auction design, cross-border coordination, and strategic spectrum management.

What is a 5G auction 2025?

On March 24, 2025, the long-awaited auction of coverage bands in the 700 MHz and 800 MHz bands, referred to as the "5G 2.0" auction, began. For the telecommunications market in Poland, this is a strategic event that could completely change the landscape of mobile services in our country. What are the 700 MHz and 800 MHz frequencies?
