

Polish Communications Company 5G Base Station

Overview

How many 5G stations are there in Poland?

A network of 100 transceivers will be operating in 7 Polish cities - Warsaw, Gdansk, Katowice, Lodz, Poznan, Szczecin and Wroclaw. The second stage of Plus 5G network development in Poland will be to provide coverage for the entire area of Warsaw and the towns and places around it, with over 600 additional 5G stations being constructed.

Where is 5G deployed in Poland?

Operators have prioritized 5G deployments in the richest and densest parts of Poland where fiber is heavily deployed, including the Masovian (Warsaw) and Pomeranian (Tri-City) provinces.

Is Poland ready for 5G?

Poland's mobile market is today awash with deployment activity, as operators ramp up capital spending to the highest levels in years to equip thousands of mobile sites with mid-band spectrum, accelerate the sunset of 3G networks, and lay the groundwork for launching 5G standalone (SA) in the coming years.

Should Polish operators deploy mid-band spectrum in a 5G auction?

Late to the game in holding a 5G auction, Polish operators are now racing to deploy mid-band spectrum in a bid to better compete for the growing premium market segment.
