How much does a solar inverter cost?

The overall cost breakdown shows that while necessary, inverters are a relatively small part of the total investment in solar technology. After applying tax credits, the total cost to install a solar system, inverter included, comes to between \$10,600 and \$26,500. In 2023, there was a 15% drop in the price of residential systems.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.
