

Portugal 5g Base Station Project Department

Overview

What is the density of 5G base stations in Portugal?

Regarding the density of 5G base stations in Portugal, it was found that at the end of the 2nd quarter of 2023, the average was approximately one station per 12 km², with an increase in density compared to the previous quarter, which shows the growth of the 5G network in Portugal.

What is Portugal doing to promote 5G technology?

Innovation and Research Initiatives: Portugal has also been promoting innovation and research initiatives to support the development and deployment of 5G technologies across various sectors. Collaborative projects involving academia, industry, and government entities are encouraged to explore new use cases and applications of 5G.

How many 5G base stations are there in 2023?

At the end of the 2nd quarter of 2023, according to information reported to ANACOM, the number of base stations installed in the national territory using 5G technology totalled 7831 stations, spread across 308 municipalities (100% of the country's municipalities) and 1833 civil parishes (59% of the country's civil parishes).

How will 5G change the telecommunications landscape in Portugal?

Future Prospects: As 5G technology continues to evolve, network and spectrum sharing will likely play an increasingly important role in the telecommunications landscape in Portugal. ANACOM is expected to continue supporting sharing initiatives and updating the regulatory framework to reflect new developments and best practices.
