

Price Standard Specifications for Lead-acid Battery Equipment for solar container communication stations

Overview

What are lead acid batteries used for?

Batteries collected mainly include car batteries and other automotive application but also include lead acid batteries used for solar, UPS and other industrial applications. The popularity of this service and the BTS Containers is growing every year. Why Wood Pallets Shouldn't Be Used For Transporting Lead Acid Batteries?

.

What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What is a battery transport & storage container?

The Battery Transport & Storage Container, helps companies comply with the various regulations governing the storage and transportation of lead acid batteries. And thereby meet their "duty of care" and "chain of responsibility" requirements.

What is the best way to transport used lead acid batteries?

The default device for transporting used lead acid batteries (ULAB) in most countries throughout the world, is the wood pallet. It is popular due to its low cost, widespread availability and the convenience of being able to transport one way. The wood pallet however has a number of significant drawbacks for transporting ULABs, including;
