

# **Price of 100kW collapsible containers for Southeast Asian ports**

## Overview

---

Are global container shipping rates still 46% lower than last year?

Global container shipping rates are still 46% lower than they were in November last year. Drewry's World Container Index puts the global average price of shipping a 40ft container at \$1,859 (USD) for 13 November, 2025.

What drives container shipping prices?

Some of the key drivers of container shipping prices include: Supply and demand dynamics in the shipping industry play a significant role in determining container shipping rates. When demand for container space is high (e.g., during peak shipping seasons or when global trade is robust), shipping rates tend to increase.

Why is the container shipping route from China to Southeast Asia important?

The container shipping route from China to Southeast Asia is a well-traveled and vital trade route due to the close proximity of these regions and the significant volume of trade between them. Several routes and ports are commonly used for shipping containers from China to various destinations in Southeast Asia.

What will Asia's container shipping market look like in 2025?

As 2025 approaches, Asia's container shipping market is at a pivotal moment. The region, which plays a dominant role in global trade, is grappling with economic shifts, regulatory changes, and sustainability initiatives that will define the industry's trajectory. 1. Overcapacity and Rate Volatility
