

Price of a 5KW inverter

Overview

How much does a 5kw solar inverter cost?

For example, decent-quality 5kW solar inverters, which can support up to 6.6kW of panels, start at \$1,000 for budget single-phase models (e.g., Sungrow, Goodwe, or Solis) and up to \$2,000 for premium single-phase models (e.g., Fronius or SMA). If you want a 3-phase, 5kW inverter; add around \$400 to those prices.

Can a 5kw inverter be used with a 6.6kw Solar System?

For example, a 5kW inverter is suitable for use with a 6.6kW solar system. There are system losses as solar panels convert sunlight to electricity. It allows for the use of lower-rated inverters. Make sure that the inverter you buy has a long enough warranty.

Is a 5 kW inverter worth it?

It could be that the system will spend such little time providing above 5 kW, once shading and losses are taken into account, that it's not worth the cost of getting the next-largest inverter.

How much does a solar inverter cost?

A good-quality 5kW single-phase solar inverter costs \$1,320 - \$2,500. A 3-phase solar inverter costs between \$1,900 and \$2,300, depending on the quality. While inverters have a 15-year lifespan, but some makes and models are more reliable than others. Speak to your local installer about the best brands and models currently available.
