

# Price of generator silencer container

## Overview

---

Can a silencer box be built over a generator?

If you want a more comprehensive solution, you can build a silencer box that installs over your generator to muffle the noise, similar to the plywood method. Building a silencer box will take a bit of woodworking, but it provides an easy way to muffle the sound of your generator quickly and even on the go.

How much does a silencer cost from SilencerCo?

SilencerCo sells its suppressors. The least expensive one, the Harvester for hunting rifles, costs \$750. The most expensive one, the Saker, goes for \$1,300. Nearly half a million silencers were sold in 2013, CNN reports, with no signs of the trend declining.

Why should you choose ISO container generators?

The acoustic properties of the container can lower the noise level of the chosen generator by up to 40dB (A), depending on both the size and model of the generator. The cooling system, silencers and sound traps are designed to reduce installation costs and due to the ISO container dimensions, the unit is easy to transport & lift.
