

# **Price of waterproof photovoltaic container for Indian farms**

## Overview

---

How much does a 1 MW solar farm cost in India?

Setting up a 1 MW solar farm in India involves several factors that affect the total investment in solar farm solutions. The cost to build a 1 MW solar farm generally ranges from ₹5 crore to ₹7 crore which depends on land prices, quality of equipment & installation charges.

What is a containerized solar PV system?

Powtech's Containerized Solar PV Solution utilizes innovative hybrid technology housed within a standard 20-ft marine container, delivering up to 10,000 kWh of energy annually. The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery backup system.

How much does a solar farm cost?

The solar farm cost includes annual operation & maintenance expenses of approximately 1,200 per kilowatt or 12 lakh per megawatt. For e.g., a 10 MW solar farm with a solar panel farm cost of 80 crore will have yearly O&M costs of around 1.2 crore, roughly 1.5% of the total solar farm installation cost.

Are agrivoltaics a viable alternative to solar power?

Agrivoltaics—the simultaneous use of land for both agriculture and photovoltaic (PV) power generation—offers a potential solution. Studies show potential for increasing crop yield and panel efficiency, making agrivoltaics an attractive option for farmers and solar developers.
