

# Price per square meter of solar curtain wall

## Overview

---

How much does a curtain wall cost?

According to Hardev, the installed cost of passive curtain wall (industry jargon for an ordinary glass exterior) is on average \$100 per square-foot, despite varying considerably. He suggests that an active (solar cell) curtain wall would cost closer to 30 percent more, or \$130 per square-foot, including wiring.

Why do curtain wall systems cost so much?

The size and dimensions of the curtain wall system play a crucial role in determining the price. Larger systems require more materials, increased fabrication time, and specialized transportation. Additionally, oversized glass panels may need additional support and engineering considerations, resulting in higher costs.

How much does a window wall cost?

Construction costs can vary significantly, and one practical example of this is evident in the comparison between window walls and unitized curtain walls. Typically, installing a window wall can cost almost half as much as a unitized curtain wall.

How do I get accurate price quotes for a curtain wall system?

To obtain accurate price quotes for a curtain wall system, it is essential to provide detailed project specifications, including design drawings, material preferences, performance requirements, and project timeline. This information will enable suppliers and contractors to provide comprehensive and accurate cost estimates.
