

Price reduction for 40-foot smart photovoltaic energy storage containers used in wastewater treatment plants

Overview

Container Size: 40-foot containers are 20-25% cheaper per kilowatt-hour (kWh) compared to 20-foot containers, mainly due to economies of scale. Can solar PV be used in wastewater treatment plants?

Strazzabosco et al. assessed the status of solar PV in WWTPs of various sizes in California, USA, and determined the potential of solar PV in the wastewater industry . Colacicco et al. proposed a solar PV design method for WWTPs to optimize the energy consumption of oxidation tanks in WWTPs .

What is the PV potential of a wastewater treatment plant (WWTP)?

The PV potential of a WWTP is correlated with its planned wastewater treatment capacity. The number of wastewater treatment plants (WWTPs) in China is fast growing as the country's urbanization accelerates. WWTPs, part of the high-energy-consumption industry, must use a lot of energy in wastewater treatment.

Are energy storage systems reducing the cost of batteries?

The scale of the reduction suggests that in addition to the falling cost of batteries—BNEF's recent Lithium-ion Battery Price Survey found that battery pack prices fell 20% year-on-year to 2024, again the biggest drop recorded to date—energy storage system providers are working on cost reduction in other areas, Kikuma said.

Can solar PV Design Optimize oxidation tanks in WWTPs?

Colacicco et al. proposed a solar PV design method for WWTPs to optimize the energy consumption of oxidation tanks in WWTPs . Campana et al. realized 100% renewable WWTPs by combining a PV system with wind turbines, multi-energy storage technologies, and reverse tertiary osmosis treatment to absorb the power production surpluses .
