

# **Pumped storage power station near the city**

## Overview

---

The pumped storage power station (PSPS) is a special power source that has flexible operation modes and multiple functions. With the rapid economic development in China, the energy demand and t.

Where is Fengning pumped-storage power station?

A drone photo taken on Dec. 31, 2024 shows the underground workshop of Fengning pumped-storage power station in Fengning Manchu Autonomous County, north China's Hebei Province. Fengning power station, the pumped-storage power station with the largest installed capacity of its kind in the world, was put into full operation on Tuesday. [Photo/Xinhua].

Where is China's pumped-storage power station located?

(Photo by Wang Liqun/Xinhua) TAIYUAN, March 22 (Xinhua) -- In the mountainous region of Daixian County, north China's Shanxi Province, a pumped-storage power station with a total installed capacity of 1.4 million kilowatts is set to begin construction in June.

Are pumped-storage power stations a new investment hotspot in China?

Due to the demand for new energy installations, pumped-storage power stations have become a new investment hotspot in China's power industry. According to official data, by the end of 2024, China's installed pumped-storage capacity had exceeded 58 million kilowatts, with the industry showing an overall positive development trend.

Why do we need a pumped-storage power station?

To cope with the instability of wind and solar power output, a pumped-storage power station is needed to regulate and ensure the safe operation of the power grid, as well as reducing the waste of unused renewable energy.
