

Purchase inverters for sale

Overview

Where can I buy a solar inverter?

sun.store is a professional B2B marketplace built for contractors who need to move quickly from design to delivery. Here you can compare solar inverters side-by-side, check transparent stock across multiple suppliers, and buy solar inverter models that match your bill of materials without chasing quotes across inboxes.

What are the different types of solar inverters?

The other popular type of inverter for solar panels is the central inverter. It functions similarly to a string solar inverter, but bigger and can handle several strings. They are used in commercial solar systems, where a lot of solar power has to be converted.

What is a solar inverter?

Inverters convert direct current (DC) electricity produced by solar panels into a sinusoidal alternating current (AC) of 220V, which is suitable for most electrical appliances. The assortment of inverters for solar systems on the market today is huge.

What type of Inverter should I buy?

This equipment is ideal for installation in residential areas, is highly efficient, reliable and durable. Inverters with single-phase and three-phase alternation current output of 220 and 380 V are readily available in our online store. Three-phase models can be used in homes or industrial sites.
