What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), is an easy-to-install device designed to provide backup power to computers, servers, server rooms and data centres in the event of a main energy failure, electrical surge or unexpected power cut.

How do uninterruptible power supplies work?

For more information, check out our complete guide to uninterruptible power supplies. An online UPS system supplies power by converting incoming AC power to DC and then reconverts it to a stable AC output through an inverter, all while continuously charging the batteries.
