

Quotation for a 150-foot collapsible container project

Overview

What are collapsible shipping containers?

While shipping containers are typically thought of as containers to be used for shipping, collapsible shipping containers bring a whole new angle. Collapsible shipping containers are very similar to regular shipping containers. The difference in the collapsible ones is that they are just that, collapsible.

Should a container be collapsible vertically?

Collapsing vertically has its benefits, but strength is not one of them. Given the requirement to position containers anywhere on a vessel, the industry must be confident that a collapsible container can sustain the weight of fully laden boxes both at sea and in the port.

What types of buildings are made from shipping containers?

IPME designs and manufactures a multitude of shipping container projects, including buildings made from shipping containers. Some of the structures we've engineered include shipping container malls, schools, restaurants, and office spaces.

What are the benefits of collapsible shipping containers?

Collapsible shipping containers come with many benefits. You can always feel safe and secure inside even if you are surrounded by chaos. The insulation helps protect against noise and keep a quiet environment for you to work in. These containers are made to be fire resistant, and insulated against extreme temperatures.
