

# Reset circuit breaker factory in Uzbekistan

## Overview

---

What is a tripped breaker?

The terms "tripped breaker" or "tripped circuit" denote situations where the circuit breaker has automatically switched off due to an overload or short circuit, effectively cutting off the power supply to that specific area. This comprehensive guide aims to provide an in-depth understanding of circuit breakers and how to reset them.

How do you reset a tripped circuit breaker?

To reset a tripped circuit breaker, move the breaker handle to the full "off" position, then back to the "on" position. You should hear a distinct "click" as the breaker resets and the contacts engage. Make sure that the breaker is fully reset and the handle is securely in the "on" position.

How do I Reset my AC breaker after tripping?

Type I circuit breakers, such as ACBP-N, ACBP4-PL and ACB2-PL, automatically reset themselves after tripping. Find and correct the issue (short circuit or overload). No manual reset is needed — the breaker will automatically reset once it cools and the fault clears.

How do I fix a tripped breaker?

Prepare to Reset the Breaker: Ensure all connected appliances are turned off before resetting the tripped circuit. Reset the Breaker: Firmly push the tripped breaker to the "off" position and flip it back to "on." Professional assistance may be necessary if it won't stay ON or immediately trips again (or if it's stuck in the middle).
