Overview

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities – wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million).

Does Romania offer a subsidy for battery energy storage systems?

From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of €150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday. Bids will be accepted until January 17, 2025.

What is Romania's energy storage requirement?

Minister of Energy Sebastian Burduja reportedly declared at a conference that Romania's storage requirement is 4,000MWh, and that half would be covered by BESS and half by pumped hydro energy storage (PHES) technology.

When will a battery storage grant be available?

Bids will be accepted until January 17, 2025. Under the scheme, grants will be available for battery storage systems built alongside existing renewable energy plants – wind, solar or hydro. The storage capacity should annually absorb at least 75% of the energy produced by the renewable energy facility to which it is directly connected.
