

# Romanian Flow Battery

## Overview

---

Will Sinteza build a gridstar flow battery factory in Oradea?

Lockheed Martin and Romania's Sinteza S.A. have signed a letter of intent to build a GridStar Flow battery factory in Oradea. The GridStar Flow technology, developed by Lockheed Martin, is an innovative solution for clean, zero-carbon energy storage with increased resilience to grid disruptions.

How much money does Romania spend on battery technology?

The total budget allocated to the state aid scheme for battery technology is €75.76 million, with the possibility of extension up to €149.25 million. This investment reflects Romania's strategic interest in developing a sustainable and competitive industry.

Will Romania become a European energy storage center?

A €50 million project promises to turn Romania into a European energy storage center, thanks to an agreement between US giant Lockheed Martin and Romanian company Sinteza SA.

When will energy transition start in Romania?

The new production facility in Oradea will be the first of its kind in Europe and the largest globally, with production scheduled to start in summer 2026. "Energy transition is Romania's chance to have secure, cheaper and greener energy, but also a unique opportunity to revitalize Romanian industry.
