

# **Saudi Arabia lithium energy storage power supply procurement EK**

## Overview

---

What is Saudi Arabia's battery storage program?

The projects mark the first phase of Saudi Arabia's battery storage program, designed to support its goal of 50% renewable energy by 2030. Each 500 MW facility will operate for four hours, providing 2,000 MWh of total power capacity, said the Saudi Power Procurement Company (SPPC).

Is Saudi power procurement Company (SPPC) a prequalified bidder?

According to foreign media reports, the Saudi Power Procurement Company (SPPC) has officially announced the list of prequalified bidders for its first battery energy storage system (BESS) procurement.

Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.

Should Saudi Arabia invest in lithium?

Given their extensive experience in the energy sector, well-developed infrastructure in industrial zones such as Jubail and Yanbu, and their geographical landscape with untapped land that could contain lithium reserves, Saudi Arabia is well-positioned for this venture.
