

# **Scalable Financing Solutions for Photovoltaic Containers**

## Overview

---

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How much money do we need to invest in solar PV?

Although the world is already investing around \$1 billion a day in solar PV, there is still a critical gap in the finance needed to realize an energy system with solar as the backbone, especially in emerging markets.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is GSC's international solar finance group?

At COP29 in Baku, GSC launched its International Solar Finance Group, a dialogue platform comprising of both public and private banks, investment funds, MDBs and solar industry representatives to work together to solve the barriers preventing further mobilisation of capital for solar PV in developed and developing countries.
