

Senegal home solar system

Overview

Does Senegal have solar power?

Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually. In 2023, solar power made up 47.4 percent of the country's renewable energy portfolio, followed by hydro and wind power.

Which solar companies operate in Senegal?

3.2%. Attracted by the stable political environment, several notable local and international solar PV companies like Oolu Solar and Baobab+ operate in Senegal, using cash sales, pay-as-you-go (PAYGo), and partnerships with micro-finance institutions.

What are the barriers to solar power adoption in Senegal?

Small- and medium-sized enterprises account for nearly 90 percent of businesses in Senegal. Photo: UNDP Senegal The survey also identified key barriers hindering the broader adoption of solar power in both rural and urban households. Nearly half of respondents cited limited access to equipment and lack of financing as major obstacles.

Is Senegal ready for a solar energy transition?

This transition is expected to be fueled by the Just Energy Transition Partnership (JETP) as well as private sector investment. Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually.
