

Senegal requires energy storage power stations

Overview

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

Does Senegal have a good electricity supply?

The country has made significant progress on electricity access, which rose from 39 percent in 2001 to 74 percent in 2023, one of the fastest increases in Africa. Moreover, a quarter of Senegal's electricity supply now comes from renewable sources like solar, hydro and wind.

Can renewables improve energy access in Senegal?

How Renewables Can Advance Energy Access and Ec. In recent years, energy has been at the front of Senegal's national agenda. The country has made significant progress on electricity access, which rose from 39 percent in 2001 to 74 percent in 2023, one of the fastest increases in Africa.
