Overview

What is a solar panel combiner box?

Solar photovoltaic array combiners (solar panel combiner boxes) are commonly used to combine several solar panels (or strings of panels) into a common bus. They are basically junction boxes that are specially designed for the types of wiring used in PV systems.

Who makes DC combiner boxes?

LSP is the most professional manufacturer of DC combiner boxes, offering any level of protection required. They are one of the very few companies providing a full range of test equipment and engineers to confirm the parameters of all their PV combiner box designs and products.

What is an array combiner?

They are basically junction boxes that are specially designed for the types of wiring used in PV systems. Array combiners are usually needed for larger systems, but even in small PV systems it can make wiring, monitoring, and future troubleshooting much easier. We recommend using breakers instead of fuses for 12 to 48 volt array combiners.

What is a PV combiner box?

Since 2010, LSP has been dedicated to designing and manufacturing surge protective devices protecting installations from transient overvoltages that result from switching events and lightning strikes. PV combiner box combines PV array outputs, ensures safety with breakers and fuses, increases reliability, and simplifies connections.
