

# Solar Dual Panel Onsite Energy

## Overview

---

What are dual-use photovoltaic technologies?

Dual-use photovoltaic (PV) technologies, also known as dual-use PV, are a type of PV application where the PV panels serve an additional function besides the generation of electricity.

When is a solar system considered an onsite system?

When a solar system is installed directly on the purchaser's property, and the renewable energy that it produces is consumed there, it's considered an onsite system.

What is a standalone solar power generation system?

Standalone solar module power generation system power controller with lightning protection In traditional standalone solar power generation systems, the battery pack serves as the energy storage component.

How do I install solar energy onsite?

There are a couple ways to go about installing solar energy onsite: one is financing the installation yourself and another is entering into an onsite power purchase agreement (PPA) with a developer.
