Overview

How much does a solar air conditioner cost?

The exact amount depends on the number of air conditioners, the number of solar panels required, and a few other variables. Solar-powered air conditioners can cost \$2000 before installation while around \$5000 including installation. However in some cases, though, this can gain you a 26% tax credit to bring your costs down.

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

How many solar panels does a solar air conditioner have?

Usually, they will come with between two and six solar panels. These systems can be paired with solar batteries as well, so extra energy produced by the solar panels can be used later when the sun goes down. When paired with a battery, these systems are referred to as "solar hybrid air conditioners".

How many square ft can a solar air conditioner cool?

The air conditioner can heat or cool up to 750 Sq. Ft (69 m²). It is a self-cooling air conditioner that requires no grid connection. This air conditioner operates on 100% solar power and does not require batteries, an inverter, or a charge controller. It also works on grid power when the best solar conditions are unavailable.
