

Solar container battery liquid cooling unit

Overview

What is a containerized battery energy storage system?

Provide users with a peak-valley electricity price arbitrage mode and stable power quality management. Shipped in a 20ft container, Sunwoda's containerized battery energy storage system (BESS) is an all-in-one energy storage solution for various scenarios.

What is a liquid-cooling system?

Liquid-cooling systems are carefully integrated into BESS containers to efficiently manage the heat, said Zhehan Yi, utility and ESS director at CPS America. The liquid-cooling system in the CPS Power Block 5-MWh container uses a multi-level system control.

Will a liquid cooling system be used for temperature control?

For every new 5-MWh lithium-iron phosphate (LFP) energy storage container on the market, one thing is certain: a liquid cooling system will be used for temperature control. BESS manufacturers are forgoing bulky, noisy and energy-sucking HVAC systems for more dependable coolant-based options.

How does a liquid cooling system work?

Liquid cooling systems in BESS work much in the same way — coolant cycles around battery packs to manage heat. Liquid-cooling systems are carefully integrated into BESS containers to efficiently manage the heat, said Zhehan Yi, utility and ESS director at CPS America.
