

Solar container energy storage system converter box

Overview

What is a boxpower solarcontainer?

The BoxPower SolarContainer is a pre-wired microgrid solution with integrated solar array, battery storage, intelligent inverters, and an optional backup generator. Microgrid system sizes range from 4 kW to 60 kW of PV per 20-foot shipping container, with the flexibility to link multiple SolarContainers together or connect auxiliary arrays.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What solar container options does boxpower offer?

BoxPower offers standard SolarContainer options which we configure to fit your needs. BoxPower SolarContainers are highly configurable, with the ability to seamlessly adjust the solar, battery, and inverter capacities to optimally serve your energy loads. Component size ranges for a single container are as follows:.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
