

# **Solar container lithium battery station cabinet sea transportation**

## Overview

---

Are battery energy storage systems a threat to maritime safety?

12. March 2025 In recent years, demand for the maritime transportation of containerised Battery Energy Storage Systems (BESS) has grown significantly. However, due to the high safety risks associated with energy storage containers, their transportation poses new challenges to maritime safety.

Are battery energy storage systems safe aboard ships?

In recent months, Gard has received numerous inquiries about the safe transportation of battery energy storage systems (BESS) aboard ships. This article addresses some of the key risks, regulatory requirements, and recommendations for shipping such cargo.

What is a battery energy storage system?

Battery energy storage systems (BESS), often referred to as energy storage cabinets or megapacks, are integral to the clean energy transition, according to the International Energy Agency. These systems consist of multiple devices assembled into a single unit capable of storing significant amounts of energy.

Why should you choose Huin international logistics for battery energy storage systems?

HUIN International Logistics offers expert, safe transport solutions for Battery Energy Storage Systems (BESS), ensuring reliability and compliance throughout the entire shipping process.
