

# **Solar glass installed in office buildings**

## Overview

---

Can Photovoltaic Glass be used in office buildings?

Googleplex, Mountain View: Increases energy efficiency and contributes to sustainability goals with photovoltaic glass panels used in office buildings. In addition to these projects, smaller scale housing projects are also available. photovoltaic glass Its use is becoming increasingly widespread.

Can glass-glass solar panels be installed on glass facades?

Customized glass-glass solar glass systems, which are solar panels with solar cells arranged between two glass lites, can be installed with most conventional glass building systems. Tailor-made solar systems comply with all design requirements for glass façades.

What are solar glass systems suitable for?

Solar glass systems are ideal for integration in both existing buildings and new construction. They are individually adapted to requirements depending on façade type, façade grid, construction type, building height and location. Vitro Architectural Glass will develop the optimal solution for your projects.

How does a solar window work?

Although it looks similar to traditional windows, it converts sunlight directly into electricity thanks to the thin-film solar cells integrated into its surface. This technology offers an excellent solution for increasing the energy efficiency of buildings and taking advantage of renewable energy sources.

## Solar glass installed in office buildings
