

# Solar glass rectangle

## Overview

---

What is a glass glass solar module?

Glass glass solar module is a long lasting and ultra resistant to any weather conditions Building Integrated Photovoltaics solution. BIPV solar panels can be used as an additional power source and alternative material in architecture to achieve future design for a comparable to standard materials price.

What type of solar panels does metsolar offer?

Metsolar manufactures standard glass/ glass, glass/ backsheets BIPV solar panel options with possibility for variations in size, shape, transparency, JB, etc. For seamless integration and blending design. Full black modules are used when complete fusion with an object and invisibility is required.

Which solar panels can be produced with full or cut solar cells?

All our PV products can be produced with full or cut solar cells as per demand. Metsolar manufactures standard glass/ glass, glass/ backsheets BIPV solar panel options with possibility for variations in size, shape, transparency, JB, etc. For seamless integration and blending design.

What is a solar cell cover glass?

Our Solar Cell Cover Glasses offer a range of technical advantages when used for space or terrestrial applications such as photovoltaic systems and optical solar reflectors. Transmittance across the spectrum from UV-A to near-infrared is excellent, while low-wavelength UV radiation is effectively blocked.
