Overview

What are glass-glass solar panels?

Glass-glass solar glass systems, also known as glass-glass solar panels, offer plenty of options for design and construction. Vitro Architectural Glass specializes in developing optimal solutions for these projects.

What is a solar lite?

Solar lites are double-glazed glass units that permit the use of various glass substrates and coatings, as well as back-painted spandrel glass to showcase color in the façade and support design objectives.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

What is Photovoltaic Glass?

Unlike traditional solar panels that absorb visible light, photovoltaic glass converts primarily ultraviolet (UV) and infrared light into electricity, making it suitable for windows, facades and other transparent surfaces of buildings, vehicles and equipment.
