

Solar integrated curtain wall

Overview

What is solar photovoltaic curtain wall?

Solar photovoltaic curtain wall integrates photovoltaic power generation technology and curtain wall technology. It is a high-tech product. It is a new type of building material that integrates power generation, sound insulation, heat insulation, safety and decoration functions.

Which solar cells are used in photovoltaic curtain wall?

At present, crystalline silicon solar cells and amorphous silicon solar cells are mainly used in photovoltaic curtain wall (roofing) systems. Photovoltaic glass modules have different color effects depending on the type of product used.

Does Photovoltaic Glass fit in a curtain wall?

No, the BIPV photovoltaic glass structurally does not differ from other types of conventional glazing. Therefore, it is integrated into the building envelope (curtain wall, façade, or skylight) like any construction material. What solar control and comfort advantages does photovoltaic glass offer in a curtain wall?

.

What is a photovoltaic curtain wall (roof) system?

The photovoltaic curtain wall (roof) system, as the outer protective structure of the building, must first have various functions such as weatherproof, heat preservation, heat insulation, sound insulation, lightning protection, fire prevention, lighting, ventilation, etc., in order to provide people with a safe and comfortable indoor environment.
