

# **Solar inverter enterprise profit margin**

## Overview

---

Industry benchmarks suggest that the average profit margin for a Solar Power Inverter business is around 10-20%, with some companies achieving higher margins through efficient operations and cost management. What is the average profit margin for a solar business?

The average profit margin for a solar business is about 10%. In your first year or two, working part-time you could do two installations per month for \$17,000 per installation and make about \$400,000 in annual revenue, which would give you about \$40,000 in profit.

How much is the PV inverter market worth?

The PV inverter market was valued at USD 25.5 billion, USD 29.9 billion, and USD 34.6 billion in 2022, 2023, and 2024, respectively. The string inverter market is expected to grow at a CAGR of 9.8% between 2025 and 2034 due to their cost-effectiveness, scalability, and ease of installation.

How is PV inverter market segmented?

Based on phase, the PV inverter market is segmented into single phase and three phase. The three phase segment held 86% market share in 2024, owing to swift industrial development favored by commercialization throughout the emerging countries, along with considerable operational flexibility across various applications.

What is the global market for central inverters?

The global market for central inverters is anticipated to be over USD 30.8 billion by 2034. These inverters have been categorized as stationary inverters primarily serving across a large-scale solar farm or a utility-aided solar deployment.
