## Overview

---

What are PV module clamps for solar mounts?

PV module clamps for solar mounts are used to install solar panels on solar rails. They are universal and standard mounting system clamps, and we provide them according to the module size. We ensure sufficient strength by using high-quality aluminum to fix the panel. The universal panel clamp makes it easier to install solar panels.

What are solar panels mid clamp & end clamp?

Solar panels mid clamp and end clamp, they are essential components in solar panels installation. Through connecting solar panels and fixing them on rails, make sure to install modules in right position and direction.

What is the function of a solar panel clamp?

The solar panel clamp is used to install two solar panels on the rails. It is supplied with bolts to fit our aluminum rails and is designed to be bolted to the aluminum rail and can slide for adjustment. The aluminum solar panel mount mid clamp is used in this process.

Where should solar panel clamps be placed?

Solar panel clamps should be placed in 'clamping zones' as defined by the panels' installation manual. They should ideally be through the roof cavity and within about 300mm of the top and bottom of the panels.
